L'esperienza italiana nel programma LIFE Ambiente

Premessa

Il programma LIFE (The Financial Instrument for the Environment) è stato uno dei principali strumenti per l'attuazione, lo sviluppo ed il miglioramento della politica e legislazione ambientale dell'Unione Europea. Il Programma, articolato nelle tre componenti¹ Ambiente, Natura e Paesi Terzi, si è sviluppato in tre fasi coprendo un arco temporale di 15 anni, dal 1992 al 2004, con un prolungamento di due anni al 2006. Il programma, rientrando nelle azioni comunitarie sullo sviluppo sostenibile, ha cofinanziato iniziative in campo ambientale negli Stati membri dell'Unione Europea, nei Paesi terzi del Mediterraneo e del Mar baltico e nei Paesi candidati a divenire Stati membri dell'Unione Europea.

Relativamente al futuro di questo strumento finanziario per l'ambiente, si sta al momento discutendo una proposta di Regolamento, denominato LIFE+, che decorrerà dal 2007 al 2013, che non è però oggetto del presente documento.

La Commissione Tecnico Scientifica (CTS) del Ministero dell'Ambiente e Tutela del territorio è stata, per tutti gli anni della sua attuazione, attivamente coinvolta nel Programma LIFE Ambiente, svolgendo una attività di supporto alla competente Direzione Generale pro-tempore del Ministero valutando le proposte di progetto presentate annualmente in ambito nazionale. Questa attività, svolta in parallelo a quella dei valutatori della Commissione UE, è stata finalizzata al supporto della Delegazione italiana in sede Comunitaria. Un ulteriore coinvolgimento della CTS nel LIFE Ambiente è consistito nella partecipazione attiva agli incontri UE, sia per gli aspetti di individuazione dei criteri metodologici di valutazione, che di confronto con la valutazione comunitaria². L'esperienza maturata per mezzo di questa attività consente alla CTS di poter svolgere, a favore dei proponenti italiani, consulenza tecnico-metodologica e di indirizzo per l'impostazione dei progetti in risposta ai bandi di gara LIFE Ambiente.

Il presente documento, si propone di illustrare i risultati dell'applicazione del programma LIFE Ambiente in ambito nazionale con particolare attenzione all'ultimo ciclo (LIFE III).

Tra le informazioni e i dati riportati, per ciascuna annualità sono state illustrate le tipologie dei proponenti e la loro distribuzione territoriale, l'interesse per le

tematiche ambientali oggetto di intervento progettuale, gli importi dei progetti ed il contributo comunitario ottenuto. Sono stati inoltre presentati anche gli aspetti procedurali e metodologici per la selezione dei progetti e per l'attuazione del Programma.

Tutti i dati utilizzati in questo documento sono stati acquisiti dalla banca dati del sito LIFE della Commissione³, dalla banca dati della CTS o da documentazione acquisita direttamente a Bruxelles da componenti della CTS nella veste di rappresentanti del Ministero dell'Ambiente.

La Commissione Europea, con altre finalità, ha prodotto dal 2002 ad oggi⁴, alcuni rapporti, denominati LIFE FOCUS, utili per la comprensione delle risultanze del programma LIFE Ambiente. Essi riguardano tre delle cinque tematiche di interesse del Programma (acqua, tecnologie pulite e rifiuti), la politica di miglioramento della qualità dell'aria e il sistema di gestione ambientale EMAS. Si tratta di monografie tematiche⁵ che hanno principalmente lo scopo di illustrare l'approccio legislativo e politico della Commissione UE sui diversi argomenti attraverso la selezione e la descrizione dettagliata di una decina di progetti LIFE Ambiente che nei vari stati membri hanno avuto risultati positivi per ciascuna tematica. Al tempo stesso, questi rapporti, illustrano il contributo del programma all'attuazione della politica e legislazione ambientale comunitaria che è l'obiettivo del LIFE esplicitato nei Regolamenti di attuazione per la fase III.

Altri due rapporti LIFE FOCUS sono stati rispettivamente dedicati a tutti i progetti finanziati nell'annualità 2005 ed alle risultanze del programma dal 1992 al 2004. Nel caso della rassegna LIFE 2005 sono stati riportati il background progettuale, gli obiettivi, il beneficiario, la durata e il budget, ripartito tra partecipanti e UE. Nel caso del rapporto dedicato alle risultanze del programma⁶ è stata riportata sinteticamente, e senza riferimento ai diversi stati membri, una serie di informazioni quali l'allocazione dei fondi tra i sottotemi (che non sono strettamente quelli indicati nelle Linee Guida per i proponenti⁷), l'impatto dei

1. Il programma LIFE

1.1 Introduzione

Il Programma intendeva contribuire al co-finanziamento di progetti, presentati anche da soggetti privati, che avessero proposto nuove ed appropriate soluzioni a problemi ambientali rilevanti e ricorrenti a livello comunitario. In particolare, le azioni riguardavano l'impatto delle industrie, la gestione ambientale da parte degli Enti locali, la conservazione di habitat o specie animali e, più in generale, il miglioramento e l'attuazione della politica e legislazione ambientale comunitaria al fine di facilitare l'integrazione delle considerazioni ambientali nelle politiche settoriali dell'UE. Altre ben più importanti disponibilità finanziarie, per la realizzazione di infrastrutture nel campo ambientale, sono state rese disponibili attraverso i Fondi Strutturali; per questi ultimi, a differenza del Programma LIFE, risultava essenziale la disponibilità commerciale e non il carattere innovativo delle opere proposte per la realizzazione. Nelle aree geografiche esterne all'Unione ("paesi terzi") hanno anche trovato spazio progetti finalizzati al miglioramento delle capacità istituzionali in campo ambientale, in modo da ottenere un ravvicinamento tra le prestazioni di questi paesi e quelle dei paesi di più lunga appartenenza alla Comunità Europea.

1.2 Evoluzione del Programma

Il programma LIFE fonda le sue radici su precedenti azioni poste in essere dall'UE. Di particolare interesse va citata la Direttiva Uccelli del 1979 (direttiva 79/409/EEC) che prevedeva il co-finanziamento per la gestione di aree speciali protette dedicate alla preservazione delle specie avicole. A questa ha fatto seguito, da parte del Parlamento Europeo, l'introduzione di fondi per la conservazione della natura nel 1982 e 1983, che hanno consentito la realizzazione di svariati progetti di significativo valore. Nei successivi anni '80 l'azione comunitaria è divenuta ancor più efficace tramite lo sviluppo dello strumento finanziario dei Piani di azione comunitaria per l'ambiente (ACE - Action Communautaire pour l'Environment), focalizzandosi in particolare sullo sviluppo di nuove tecnologie pulite, nuovi strumenti per la misura e monitoraggio

dell'ambiente, protezione degli habitats e delle specie in pericolo. Questo strumento venne utilizzato nel periodo 1984-1987 (ACE I) e prolungato fino al 1991 (ACE II)⁸. In parallelo a questi programmi sono stati realizzati altri due programmi, il MEDSPA⁹ (1986-1991) per la regione mediterranea ed il NORSPA¹⁰ (1989-1991) per la difesa della regioni marittime del Nord Europa. Nell'ultimo anno prima della nascita di LIFE, la UE ha reso disponibili ulteriori finanziamenti, a supporto della Direttiva Habitats (1992) con il programma denominato ACNAT, visti i costi troppo elevati della sua attuazione.

Il 1992 ha visto la nascita del programma LIFE, che rappresenta un ulteriore sforzo della UE per un coinvolgimento delle problematiche ambientali nelle politiche della comunità e per uno sviluppo sostenibile (vedi quinto e sesto programma d'azione ambientale comunitario). Il Programma LIFE è stato sviluppato in tre fasi temporali: LIFE I¹¹ (1992-1995), LIFE II¹² (1996-1999) e LIFE III¹³ (2000-2004), questo ultimo prolungato fino al 2006¹⁴.

Nel corso delle tre fasi il programma LIFE ha visto ampliare e diversificare gli ambiti di applicazione e le tematiche da supportare. In particolare, con LIFE II il programma venne suddiviso in tre componenti: LIFE Natura, LIFE Ambiente e LIFE Paesi Terzi. Inoltre nella successione delle tre fasi (I, II e III), ad un primo approccio di acquisizione dati (finalizzato alla conoscenza dello stato dell'arte ed al monitoraggio delle problematiche) ha fatto seguito un indirizzo orientato alla gestione e controllo. Particolare attenzione hanno man mano acquisito la divulgazione, l'innovazione e l'interesse Comunitario (inteso come trasferibilità alle varie realtà dell'UE) dei progetti.

In totale, tra il 1992 ed il 2004, il Programma LIFE ha speso 1,36 miliardi di euro, realizzando 2.478 progetti. Il costo totale dei progetti è stimato pari a 3,6 miliardi di euro.

Per il periodo successivo alla terza fase del LIFE, la Commissione Europea ha presentato, nel settembre 2004, una proposta per il mantenimento di uno strumento finanziario dedicato all'ambiente che avesse caratteristiche orientate all'approccio politico ambientale, denominando il relativo programma attuativo LIFE +. Questo nuovo strumento dovrebbe interessare un periodo di sette anni

1.3 LIFE Ambiente

Per quanto attiene alle tematiche oggetto di presentazione delle proposte, nel Regolamento LIFE per la fase III, con riferimento alla componente "ambiente", sono stati definiti cinque campi di intervento:

1. Pianificazione e valorizzazione del territorio (acronimo PG1);
2. Gestione della risorsa idrica (PG2);
3. Riduzione dell'impatto ambientale causato dalle attività economiche (PG3);
4. Gestione dei rifiuti (PG4);
5. Riduzione dell'impatto ambientale dei prodotti mediante una politica di produzione integrata (PG5).

Relativamente a queste tematiche, LIFE Ambiente è stato uno strumento mirato, pur con risorse finanziarie modeste, che ha svolto una funzione di volano per iniziative a carattere innovativo in termini di metodi, tecniche o tecnologie presentate da soggetti privati oltre che da istituzioni pubbliche, una sorta di concorso delle migliori idee risolutive di problemi ambientali importanti e ricorrenti a livello comunitario o di approcci politici all'ambiente. L'obiettivo non è stato quello di finanziare la ricerca o la sperimentazione a livello di laboratorio, ma quello di poter pervenire a risultati concreti (anche un'eventuale commercializzazione), su scala adeguata alla natura del problema, della tecnologia, tecnica o metodo ideato; non sono stati neppure riconosciuti finanziamenti a favore di tecnologie o infrastrutture esistenti, ma l'applicazione su larga scala dell'idea innovativa, attraverso la realizzazione di adeguati e, per quanto possibile, in scala ridotta, prototipi dimostrativi.

Particolare enfasi è stata posta nella divulgazione e diffusione dei dati, nell'innovazione e nella trasferibilità agli altri Paesi Membri, requisiti previsti nel Regolamento stesso, oltre alle normali caratteristiche di affidabilità tecnica e

¹⁵ Proposal for a Regulation of the European Parliament and of the Council concerning the financial instrument for the environment (LIFE+), COM(2004) 621 final

finanziaria dei partecipanti richieste per qualunque progetto finanziato dall'Unione Europea. È emersa anche la tendenza a premiare i progetti che iniziassero un percorso virtuoso che si prolungasse oltre la conclusione del progetto LIFE.

I progetti di massima sono stati presentati in risposta a bandi di gara annuali, emanati dalla Commissione UE, Unità LIFE, per l'ottenimento di un cofinanziamento comunitario pari al 30% dei costi ammissibili (progetti che sono in grado di fornire reddito consistente, in genere presentati da soggetti privati) o 50% (progetti senza reddito, in genere presentati da soggetti pubblici).

Il Programma è stato gestito attraverso poche regole vincolanti per quanto attiene la formulazione dei progetti: nessun tetto all'importo progettuale complessivo (valore medio osservato intorno a 1-2M€), nessun limite alla durata (in prevalenza 18, 24, 30, 36 mesi).

Il programma LIFE, come già sottolineato in precedenza, è stato quindi uno strumento di fondamentale importanza nel contesto della politica ambientale comunitaria, e l'Italia ha giocato un ruolo molto significativo, sia per il numero e l'entità finanziaria associata ai progetti finanziati, che per quanto attiene allo sviluppo delle procedure di selezione e valutazione. Alcuni documenti di valutazione delle varie fasi in cui il programma LIFE si è sviluppato hanno consentito di adattare ed indirizzare, in corso d'opera, l'approccio alle varie tematiche proposte e di privilegiare, da parte della Commissione, quei progetti che meglio rispondevano alle priorità UE del momento.

Tali adattamenti delle priorità delle tematiche, nelle diverse annualità, si sono succeduti nei bandi di gara presentati dalla Commissione nel corso degli anni dal 2000 al 2006¹⁶ relativi alla fase III del LIFE ed alla sua estensione di due anni. Passando ad una analisi puntuale possiamo evidenziare alcuni aspetti:

- per quanto riguarda la pianificazione territoriale (PG1) possiamo notare uno spostamento da progetti riguardanti l'attività in ambito urbano, relativi alla definizione di strumenti tecnico-normativi (piani territoriali) anche di natura fiscale e sull'impronta ecologica, a progetti che riguardano principalmente il trasporto urbano sostenibile (nelle annualità 2005-2006). Le tematiche per le quali è stato finanziato un numero rilevante di proposte sono state declassate in termini di priorità: ciò è accaduto per la gestione integrata delle zone costiere e per le tecniche di rilevamento dell'inquinamento dell'aria (PM 1; PM 2,5; PM 10¹⁷). Relativamente a questo ultimo aspetto, ci si è indirizzati, nelle ultime tre annualità (2004-2006) a progetti di

¹⁶ Vedi appendice 4

¹⁷ Polveri sottili con diametro inferiore a 10, 2,5 e 1 µm rispettivamente

attuazione di piani pilota dimostrativi sul campo per il miglioramento della qualità dell'aria, nell'ambito della specifica Direttiva comunitaria e delle relative Direttive figlie;

- riguardo alla gestione delle acque, le Linee Guida per i proponenti (annualità dal 2000 al 2004) presentavano un notevole dettaglio per le seguenti cinque sotto-tipologie progettuali: a) gestione delle acque a livello di bacino idrografico; b) protezione delle acque sotterranee; c) trattamento delle acque reflue; d) prevenzione e riduzione delle fonti diffuse e disperse di inquinamento dell'acqua; e) pianificazione e aspetti organizzativi della gestione delle acque. Per le annualità 2005 e 2006, le sottotematiche sono diventate quattro, non essendo stati più previsti gli interventi "a valle" (depurazione), mentre le inondazioni (alluvioni) e l'impatto delle attività agricole sulle acque di superficie e freatiche sono diventate due sottotematiche specifiche. Anche la problematica della rimozione delle sostanze pericolose, attraverso interventi sui processi da parte delle aziende manifatturiere nei diversi comparti produttivi, nell'ambito dell'attuazione della Direttiva quadro sulle acque, ha trovato spazio tra gli argomenti oggetto di presentazione delle proposte;
- la tematica "impatto ambientale delle attività economiche" prevedeva (2000-2004) quattro sottotemi: a) tecnologie pulite; b) gestione integrata dell'ambiente; c) riduzione delle emissioni di "gas ad effetto serra"; d) turismo sostenibile. Queste tematiche, pur sempre presenti nelle Linee Guida diventano meno prioritarie nel 2003 e 2004. Questo tipo di approccio si concretizza poi ulteriormente con l'eliminazione, nel 2005, delle tematiche, gestione integrata dell'ambiente e turismo sostenibile, temi per i quali si riceveva un elevato numero di proposte da parte degli enti locali con il finanziamento di numerosi progetti italiani. Si trattava (gestione integrata) della certificazione ambientale EMAS II applicata non ai siti produttivi, ma a Enti ed Amministrazioni. Per tale tema, per le annualità 2002 e 2003, la Commissione UE aveva previsto una corsia preferenziale di finanziamento al fine di acquisire esperienze sul campo ma, poi, ha attribuito al tema bassa priorità, pur mantenendolo nelle Linee Guida, con conseguente riduzione del numero dei progetti finanziati. Per il turismo sostenibile, già per l'annualità 2003, la UE aveva ristretto il numero di sottotemi oggetto di presentazione, limitandolo a quei campi potenzialmente più efficaci nella diminuzione degli impatti ambientali causati dal turismo di massa e/o comunque invasivo. In conseguenza di tale impostazione, nel 2004, l'UE ha finanziato un solo progetto di turismo

sostenibile. Con l'adozione del VI Programma di Azione Ambientale (VI PAA) avvenuta a gennaio 2001, il turismo sostenibile perde la menzione specifica e nell'annualità 2005, le Linee Guida non prevedono più questo tema. L'UE si focalizza, nei due ultimi anni di estensione del Programma, sulla direttiva IPPC (viste anche le problematiche a livello comunitario per la sua attuazione), sulla riduzione delle emissioni di gas ad effetto serra con grande enfasi sugli aspetti tecnologici e sugli impianti di produzione energetica rinnovabile in piccola scala a livello locale. Per esigenze di complementarità con altri finanziamenti comunitari sull'energia che privilegiavano le grandi taglie impiantistiche, il LIFE riguarderà impianti di potenza inferiore ai 10 MW;

- la tematica dei rifiuti (PG4) ha visto, nelle annualità 2005 e 2006, lo spostamento delle priorità dalle tipologie dei rifiuti (rifiuti pericolosi o voluminosi o di difficile gestione) a quelle della gestione (prevenzione, riuso, riciclo). Comunque, non si sono registrati sostanziali cambiamenti, né nella tipologia delle proposte presentate, né nel numero di quelle selezionate e finanziate;
- infine, per quanto riguarda la tematica dell'impatto ambientale dei prodotti e servizi (PG5), nelle annualità 2005 e 2006, ci si è spostati da progetti genericamente rivolti all'ottenimento di marchi di qualità ambientale (territoriale e/o di prodotto) quali Ecolabel, Emas e quelli appartenenti alla famiglia ISO 14000, a progetti che affrontano la problematica dell'eco-progettazione e che tentano di risolvere/minimizzare l'impatto sia durante la fase di progettazione (o ideazione) che durante l'utilizzo del prodotto o la sua fornitura

1.4 Aspetti procedurali di gestione del programma

Il Programma LIFE è stato gestito dalla Commissione UE attraverso due Comitati: LIFE, che si è occupato della gestione dei progetti finanziati in ambito LIFE Ambiente, LIFE Paesi Terzi e LIFE Progetti preparatori; Habitat, che ha gestito LIFE Natura. Prima dell'annualità 2000, le procedure di selezione erano a disposizione presso la Commissione UE e la lista dei progetti da finanziare veniva preparata anche sulla base di una "short list" (una lista di progetti prioritari suggeriti dallo Stato membro per il finanziamento) che rifletteva le priorità nazionali in campo ambientale. Per l'annualità 2000-2001, per ragioni di trasparenza ed al fine di standardizzare il processo valutativo, per la prima volta sono state utilizzate e rese pubbliche alle Autorità nazionali di gestione del

Programma, le matrici di valutazione utilizzate, solo per LIFE Ambiente¹⁸. Esse erano composte da un numero limitato di criteri di valutazione (singoli e/o in loro combinazione) relativi ai requisiti progettuali e, quindi, mutuati dai criteri generali di cui all'articolo 2 e dai criteri specifici di cui all'articolo 4.6 del Regolamento 1655/2000. I criteri in questione, ai quali sono stati assegnati punteggi interi da 0 a 10¹⁹, hanno riguardato il carattere di innovazione della proposta, il carattere dimostrativo, il progresso atteso, la trasferibilità dell'idea, la coerenza e qualità complessiva del progetto. Ulteriori punteggi sono stati assegnati, sotto forma di bonus (fino ad un massimo di 4 punti), per l'approccio multinazionale, per la presenza di piccole e medie imprese tra i partecipanti e per la potenzialità in termini occupazionali. Lunghe discussioni nel Comitato LIFE hanno riguardato il significato di "carattere dimostrativo" e la sua quantificazione, come pure il termine "approccio multinazionale". Come criterio conclusivo condiviso, il carattere dimostrativo è stato valutato sulla base delle azioni concrete che l'idea innovativa, attraverso l'utilizzo eventuale di prototipi a scala appropriata alla natura della problematica ambientale, riusciva ad ottenere. Per quanto attiene l'approccio multinazionale, si è valutata la presenza di eventuali partner stranieri come apportatrice di know-how aggiuntivo (ed eventualmente esclusivo) che potesse contribuire a far circolare a livello europeo le migliori soluzioni ambientali. Ulteriore significato per l'approccio multinazionale discendeva dall'eventuale dimostrazione, prototipale o meno, realizzata in più stati membri, ciascuna con una diversa valenza progettuale. Negli anni successivi (dal 2002 fino all'ultima annualità 2006) tale matrice valutativa è stata sostituita da un questionario che "pesava" i medesimi requisiti, diversamente²⁰ per le ultime annualità. In casi di pari punteggio, preferenza era assegnata ai progetti con un maggior interesse comunitario e, in seconda battuta, di migliore qualità progettuale.

I progetti che totalizzavano il miglior punteggio e che complessivamente impegnavano, in termini di contributo comunitario richiesto, il doppio del budget annuale comunitario disponibile, venivano sottoposti a revisione sui punti di debolezza e/o manchevolezze dalla Commissione UE e dai valutatori esterni, che partecipano alla valutazione per il contenuto strettamente tecnico delle proposte. Il proponente doveva rispondere a domande poste per fugare dubbi oppure doveva accettare i suggerimenti, pena il non superamento della fase di revisione e, quindi, l'esclusione dal finanziamento.

¹⁸ Successivamente, dopo altre due annualità, questo approccio veniva esteso anche a LIFE Natura.

¹⁹ Punteggi fino a 4 erano escludenti. Ogni criterio era di per sé escludente.

²⁰ Vedi "Guida per il valutatore", <http://europa.eu.int/comm/environment/life/index.htm>

La procedura di selezione è stata oggetto di modifiche nel corso della fase III e la valutazione è stata generalmente effettuata in due momenti nei quali sono stati dapprima valutati i criteri tecnici (innovazione, carattere dimostrativo, trasferibilità, piano di divulgazione) e, successivamente - limitatamente ai progetti che avessero superato la prima fase - quelli qualitativi e di politica ambientale (interesse comunitario, coerenza e qualità progettuale).

Fino all'annualità 2003, la prima fase prevedeva la partecipazione dello stato membro alle riunioni di confronto sulle valutazioni, che lo stesso aveva svolte parallelamente e che erano inserite, a solo scopo consultivo, nel data base dell'UE denominato ESAP. Gli esperti e l'UE avevano modo di confrontare le loro valutazioni con quelle nazionali. Queste riunioni di confronto, focalizzate principalmente su quei progetti che avevano registrato grosse differenze di valutazione tra autorità nazionali e UE, hanno consentito talvolta di recuperare alcuni progetti che erano stati considerati negativamente nella prima fase valutativa. Un ulteriore coinvolgimento dello Stato membro era previsto con la partecipazione a livello consultivo alla riunione finale tra gli esperti esterni e l'Unità LIFE che definiva il punteggio complessivo su tutti i criteri per ciascun progetto. Si aveva, comunque, l'opportunità per lo stato membro di chiarire, anche in questa fase, eventuali quesiti posti dagli esperti esterni o dalla Commissione UE.

In merito alla procedura di selezione, la CTS ha più volte fatto presente, alla competente Direzione del MATT, l'inappropriatezza della valutazione a due fasi rispetto al poter considerare le valenze progettuali con una visione univoca. Senza tener conto del fatto che l'esclusione di un progetto dovrebbe avvenire solo per aspetti di merito: i progetti valutati positivamente, secondo il criterio tecnico, anche se non fossero arrivati nel gruppo che totalizza il doppio del budget, avrebbero dovuto avere la valutazione relativamente agli altri due criteri, ovvero quello qualitativo e quello di politica ambientale comunitaria.

Dall'annualità 2004, la Commissione UE, rivendicando una piena responsabilità anche penale, per gli aspetti di gestione finanziaria, nella predisposizione della graduatoria, ha completamente rinunciato alla collaborazione con lo Stato membro, escludendolo di fatto dalla procedura di individuazione dei progetti da finanziare: esso viene informato solo poco prima del Comitato LIFE e l'Autorità nazionale non è più a conoscenza delle motivazioni che hanno portato all'esclusione o all'approvazione dei progetti; tali motivazioni vengono fornite, solo a richiesta, ai proponenti dei progetti.

Per la preparazione della graduatoria di merito comunitaria, oltre ai criteri sopra descritti, non sono stati mai utilizzati parametri riferiti alle diverse situazioni socio economiche degli Stati membri o alla rilevanza dei problemi

ambientali nei medesimi. La graduatoria è oggetto di approvazione da parte del Comitato LIFE. Esistono aspetti di trasparenza che potrebbero essere migliorati: nell'approvare la lista dei progetti comunitari uno stato membro non conosce i progetti selezionati per gli altri stati membri (aspetti di proprietà intellettuale ne ostacolano la libera circolazione), né le valutazioni effettuate dall'Unità LIFE. L'approvazione è stata comunque possibile in maniera informata, almeno per l'Italia, in quanto le proposte nazionali sono state sottoposte a valutazione, secondo le modalità comunitarie dalla CTS, per tutte le annualità dal 1992 al 2006. La delegazione italiana ha potuto così sempre stabilire se le proposte nazionali selezionate dall'Unità LIFE erano in linea con quanto determinato dalla CTS e quindi ragionevolmente accettabili.

I progetti di massima approvati sono stati gestiti amministrativamente secondo le modalità previste dal "contratto" stipulato dal singolo beneficiario con la Commissione UE (l'Unità LIFE)²¹. Le modalità di gestione amministrativa dei progetti sono le usuali comunitarie. La consuntivazione dei reali costi sostenuti (che comunque non possono risultare superiori a quanto previsto nel progetto di massima approvato) è effettuata durante l'attuazione del progetto a valle della presentazione delle fatture attestanti le spese sostenute.

Una panoramica degli aspetti di gestione del programma LIFE Ambiente e Natura si può avere dalla lettura del rapporto della Corte dei Conti europea²² relativo alla fase II, nel quale la Corte si concentra sugli aspetti di gestione inerenti l'utilizzo delle risorse finanziarie e i risultati in termini di raggiungimento degli obiettivi. La Corte lamenta che la Commissione UE non ha dato risposte a domande fondamentali nell'ambito dell'attuazione del programma; per LIFE Natura: come hanno contribuito i progetti a frenare l'estinzione di specie minacciate in Europa? Per LIFE Ambiente: come hanno contribuito i progetti all'attuazione e sviluppo della politica ambientale comunitaria? Per questa ultima componente del Programma non è stata, rileva ancora la Corte, fatta un'analisi approfondita del grado di innovazione dei progetti finanziati.

Altri due rapporti forniscono una visione d'insieme relativamente alla fase III del LIFE: si tratta della relazione della Commissione UE del novembre 2004²³ e della società di consulenza esterna AEAT²⁴. Aspetti di debolezza sono stati rilevati

nell'attività di divulgazione dei risultati per la quale l'UE ha poi introdotto una specifica strategia che ha portato all'individuazione dei "migliori progetti LIFE Ambiente" degli ultimi cinque anni, tra i quali IMOS, del Comune di Genova, che è rientrato nei primi cinque. In alternativa a questo approccio il rappresentante CTS, ha proposto un piano che identificasse le problematiche non risolte a livello comunitario per i cinque settori tematici. La proposta prevedeva cinque eventi, in altrettante capitali europee, che permettessero di discutere dei risultati progettuali ottenuti per quel tema e dei problemi ancora aperti, con tutti i soggetti economico-sociali (stakeholders) interessati alla materia. Questo piano, forse per ragioni di disponibilità economica, non è stato recepito dalla Commissione UE. In ogni caso, la relazione della Commissione sulla fase III non ha fornito elementi relativamente al contributo del programma rispetto alle problematiche cruciali ambientali a livello comunitario e a quelle residuali.

1.5 Riferimenti legislativi

Di seguito, per un eventuale approfondimento, vengono riportati alcuni degli atti legislativi più significativi per il programma LIFE:

- Direttiva 79/409/EEC (Direttiva Uccelli)
- Regolamento CE No 1872/84 (ACE I - Action Communautaire pour l'Environnement)
- Regolamento CE No 2242/87 (ACE II)
- Regolamento CE No 3907/91 (ACNAT - Action by the Community for Nature)
- Direttiva 92/43/EEC (Direttiva Habitats)
- Regolamento CE No 1973/92 (LIFE I)
- "Towards Sustainability" the European Community Programme of policy and action in relation to the environment and sustainable development (better known as The Fifth EC Environmental Action Programme) (17/5/1993)
- Regolamento CE No 1404/96 (LIFE II).
- Decisione N. 2179/98/CE del Parlamento europeo e del Consiglio del 24 settembre 1998 relativa al riesame del programma comunitario di politica ed azione a favore dell'ambiente e di uno sviluppo sostenibile «Per uno sviluppo durevole e sostenibile».
- Regolamento CE No 1655/2000 (LIFE III) .
- Decisione N. 1600/2002/CE del Parlamento europeo e del Consiglio del 22 luglio 2002 che istituisce il Sesto Programma comunitario di azione in materia di ambiente.
- Regolamento CE No 1682/2004 (estensione di due anni di LIFE III).

2. La partecipazione italiana al programma LIFE Ambiente

2.1 Il contesto europeo

Nell'ambito del programma Life Ambiente, nel periodo 1992-2005, sono stati finanziati 1497 progetti, 25 dei quali successivamente ritirati, per un totale di 1472 progetti completati o in via di completamento²⁵. La Tabella I riporta i dati relativi al budget totale ed al cofinanziamento comunitario per i progetti finanziati, per ogni Stato membro, nel periodo 1992 - 2005.

²⁵ Nel prosieguo, con la dizione "progetti finanziati" ci riferiremo ai soli progetti approvati, finanziati e non ritirati.

La distribuzione dei progetti finanziati per ogni Stato membro e il connesso budget totale sono mostrati in Figura 1. L'Italia figura al primo posto per numero di progetti finanziati (232), seguita dalla Spagna (189), dalla Germania (152), dalla Francia (147) e dagli altri Stati membri, compresi quei Paesi che hanno aderito all'Unione Europea nel 2004²⁶, ma che hanno iniziato a presentare progetti, in alcuni casi, già dal 1998.

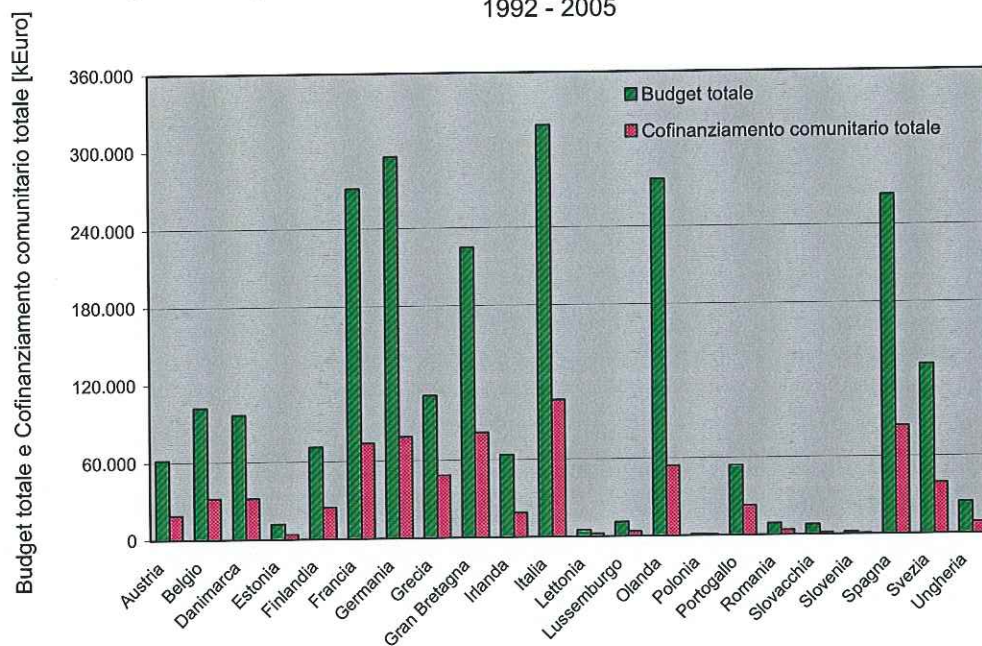

Fig. 1 - Progetti finanziati e relativo budget totale per Stato membro 1992-2005

Il budget totale e il cofinanziamento comunitario totale dei progetti finanziati per ogni singolo Stato membro nel periodo 1992-2005 sono mostrati anche in Figura 2. Sia per la prima tipologia di importi che per la seconda, l'Italia figura ancora al primo posto (rispettivamente con 319.264.226 € e 106.218.359 €), seguita, per quanto riguarda il budget totale, da Germania (295.556.169 €), Olanda (276.793.570 €), Francia (271.100.052 €) e Spagna (263.263.559 €) e, per quanto riguarda il cofinanziamento comunitario totale, da Spagna (83.988.718 €), Gran Bretagna (81.307.251 €), Germania (78.615.048 €) e Francia (73.879.460 €).

²⁶ Nel 1992, gli Stati membri dell'Unione Europea erano 12 (Germania, Francia, Italia, Paesi Bassi, Belgio, Lussemburgo, Gran Bretagna, Irlanda, Danimarca, Grecia, Spagna, Portogallo), divenuti 15 nel 1995 (con l'adesione di Austria, Finlandia, Svezia), saliti infine a 25 nel 2004 (con l'adesione di Slovenia, Repubblica Ceca, Slovacchia, Ungheria, Polonia, Estonia, Lettonia, Lituania, Cipro, Malta).

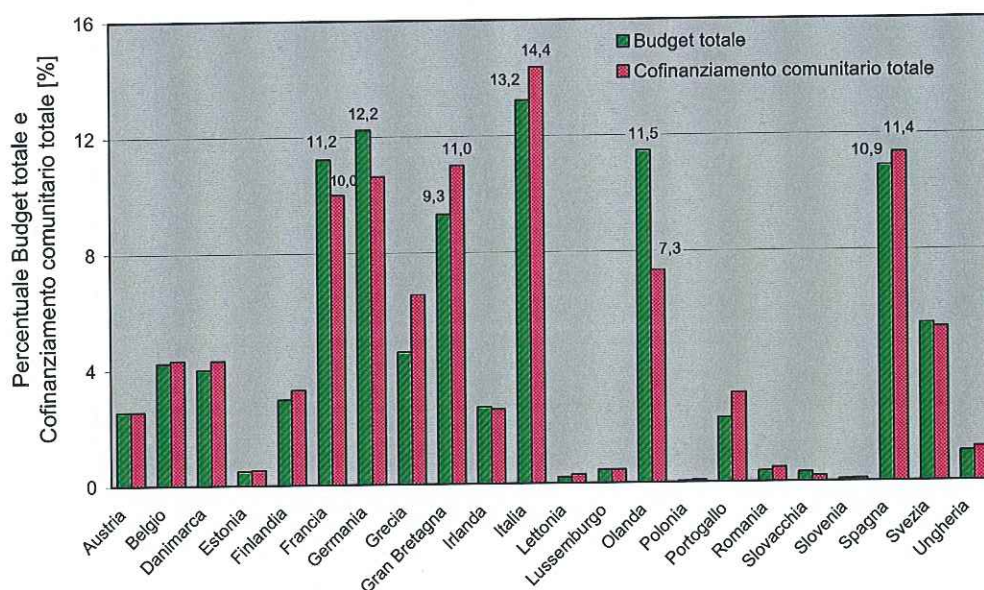

Fig. 2 - Budget totale e Cofinanziamento comunitario totale per Stato membro 1992 - 2005

Come risulta evidente dalle due figure precedenti, il rapporto tra il budget totale ed il cofinanziamento comunitario dei singoli progetti è molto variabile. Ciò è imputabile alla diversa taglia dei progetti, peraltro autonomamente presentati dai proponenti dei diversi Stati membri, e agli eventuali aggiustamenti richiesti dall'UE ai progetti dichiarati finanziabili prima dell'assegnazione del finanziamento.

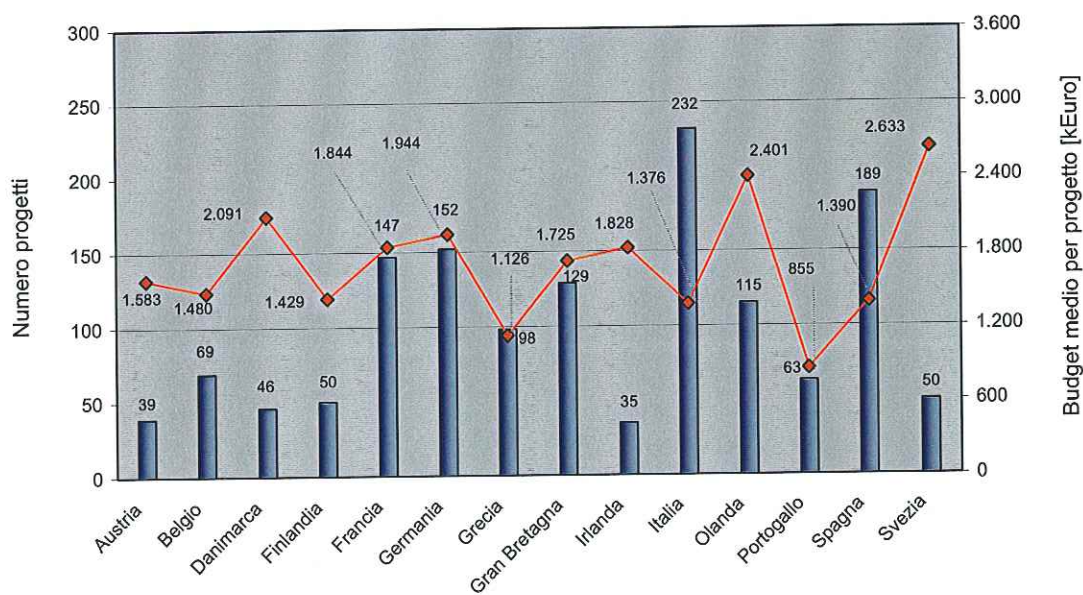

In Figura 3 sono mostrate le percentuali sul budget totale e sul finanziamento comunitario totale per i progetti finanziati per tutti gli Stati membri, nel periodo 1992-2005. L'Italia presenta la percentuale più alta tanto per quanto riguarda il budget totale (13,2%) che per quanto riguarda il contributo comunitario ottenuto complessivamente (14,4%). L'Olanda, e, in minor misura, Germania, Francia e Svezia presentano una percentuale media del budget totale superiore alla percentuale del finanziamento comunitario, indice di un maggior impegno finanziario dei soggetti proponenti a fronte del contributo comunitario ottenuto. Di converso, la Grecia e il Portogallo presentano il minor contributo relativo di fonti finanziarie proprie tra i Paesi che hanno avuto un numero di progetti finanziati superiori a 15.

Fig. 3 - Percentuale sul Budget totale e sul Cofinanziamento comunitario totale per Stato membro 1992 - 2005

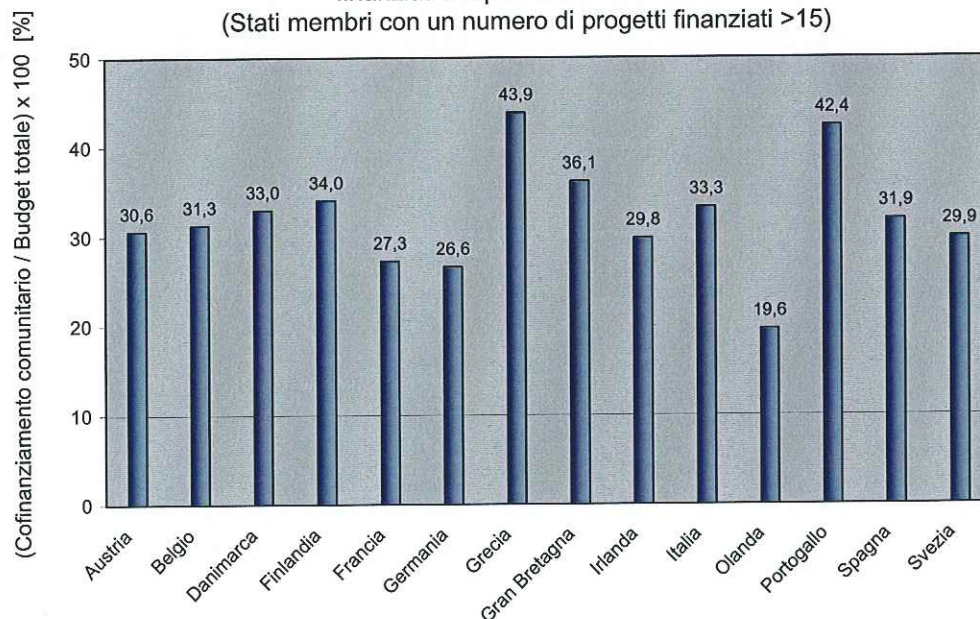

In Figura 4 è mostrato il budget medio per progetto per Stato membro, limitatamente ai Paesi con un numero totale di progetti finanziati maggiore di 15. Gli Stati membri con i budget medi per progetto più elevati sono, nell'ordine, la Svezia (2.632.838 €), l'Olanda (2.406.901 €), la Danimarca (2.101.369 €) e la Germania (1.944.448 €). L'Italia (con 1.376.139 €) è dodicesima in questa classifica, immediatamente dopo la Spagna e seguita solo da Grecia e Portogallo.

Fig. 4 - Progetti finanziati e relativo budget medio per progetto 1992 - 2005 (Stati membri con un numero di progetti finanziati >15)

In Figura 5 sono riportate le percentuali del cofinanziamento comunitario mediate nel periodo 1992-2005 rispetto al budget totale dei progetti finanziati. Per ragioni di significatività tale rappresentazione ha riguardato solo gli stati membri che in tale periodo hanno avuto più di 15 progetti finanziati. Gli Stati membri con quota percentuale media del cofinanziamento comunitario più elevata sono, nell'ordine, la Grecia (43,9%), il Portogallo (43,4%), la Gran Bretagna (36,1%), la Finlandia (34%) e l'Italia (33,3%). Come visto nel §2.3 il cofinanziamento comunitario può raggiungere il 30% dei costi ammissibili per progetti che sono in grado di fornire reddito consistente - generalmente presentati da soggetti privati - o il 50% dei costi ammissibili per progetti che non possono generare reddito - generalmente presentati da soggetti pubblici. Si rileva, ad esempio, che Grecia e Portogallo, collocate ben oltre il 30%, hanno avuto prevalentemente finanziamenti per progetti atti a non fornire reddito; viceversa, altri Stati, primo tra tutti l'Olanda, hanno avuto finanziamenti per progetti che richiedevano *in media* una quota di cofinanziamento comunitario inferiore al minimo consentito.

(Stati membri con un numero di progetti finanziati >15)

Negli istogrammi delle Figure 6 e 7 è mostrata la distribuzione di frequenza assoluta²⁷ del budget totale di tutti i progetti finanziati nel periodo 1992-2005, tanto per quanto riguarda l'insieme degli Stati membri, che per quanto riguarda l'Italia.

Le percentuali di successo negli ultimi 5 anni, ovvero il numero di progetti finanziati a fronte dei progetti presentati, sono riportate nella Tabella III, rispettivamente per tutta l'Unione Europea e per l'Italia. Per quanto riguarda l'Unione Europea, il numero di progetti finanziati per anno è rimasto all'incirca costante, attestandosi intorno ai 100 progetti; sono invece variati, seppur marginalmente e su base statistica, la taglia media dei progetti e il rapporto tra budget complessivo di ciascun progetto e cofinanziamento comunitario. Per quanto riguarda l'Italia, si osserva una percentuale di successo stabilmente e sensibilmente inferiore alla media europea, effetto non già di una bassa qualità media dei progetti presentati, come dimostrato dall'elevato numero di progetti italiani finanziati ogni anno, quanto, verosimilmente, dalla presenza di un elevato numero di proposte progettuali di livello medio-basso, effetto collaterale dell'elevato numero di progetti italiani presentati in ambito comunitario (intorno al 20-25% di tutte le proposte presentate dagli stati membri).

2.2 Profilo italiano della partecipazione

2.2.1 Considerazioni generali

La partecipazione italiana al programma LIFE Ambiente si caratterizza per la leadership in termini di numero di progetti finanziati, relativo budget totale e cofinanziamento comunitario totale. Il budget medio per progetto finanziato si colloca invece ai gradini più bassi della classifica degli Stati membri, mentre la distribuzione del budget totale dei progetti finanziati è sostanzialmente identica all'analoga distribuzione dei progetti finanziati per l'insieme degli Stati membri. La percentuale di successo negli ultimi cinque anni, ovvero il numero di progetti finanziati a fronte di quelli presentati, è stabilmente e sensibilmente inferiore alla media europea. L'Italia ha ottenuto il finanziamento annuale di un numero di progetti compreso tra 10 (1992) e 28 (2004), con un valor medio di circa 18 per anno. La maggioranza dei progetti finanziati prevede la presenza di partner, ma sono stati finanziati anche progetti presentati dal solo beneficiario (tipicamente, nel caso di progetti a carattere tecnologico). Come mostrato in Figura 30, l'insieme dei progetti a titolarità italiana finanziati nell'ambito della tematica "Ambiente" del programma LIFE nel periodo 1992-2005, copre circa il 57% del totale dei progetti finanziati nel medesimo periodo nell'ambito dell'intero programma (232 su 404). I rimanenti 172 sono stati finanziati nell'ambito della tematica "Natura"²⁸.

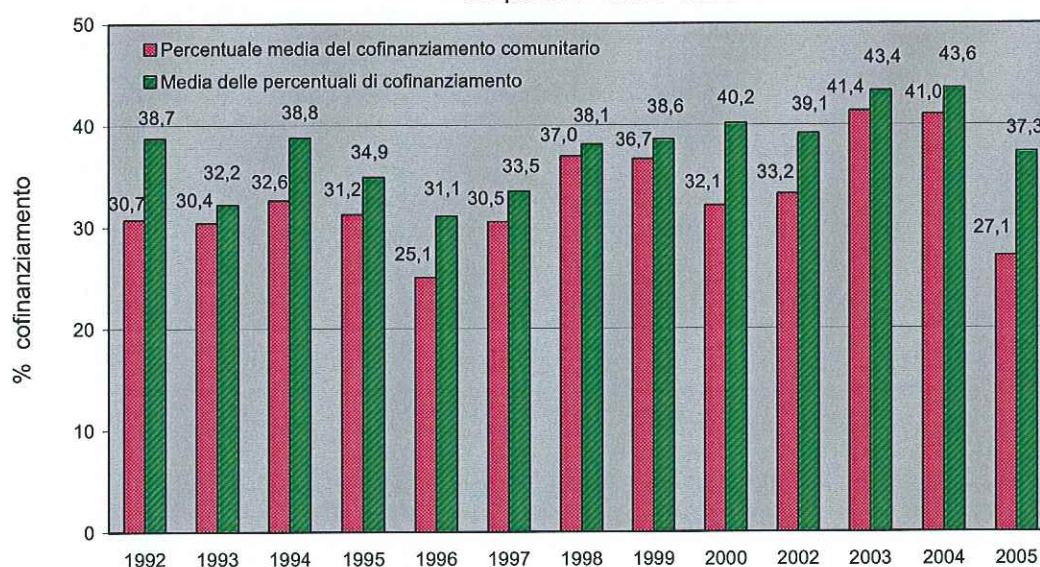

Fig. 30 - Progetti a titolarità italiana LIFE Natura e LIFE Ambiente finanziati nel periodo 1992 - 2005

²⁸ Per la precisione, nell'ambito delle tematiche "Natura" (167), "Natura Stater" (3) e "Natura Cooperazione" (2).

In Figura 31 sono mostrate le percentuali medie di cofinanziamento per le varie annualità, che determinano il valor medio del 33,3% su tutto il periodo 1992-2005 (vedi Figura 5). Accanto ad esse, sono mostrate le medie delle percentuali di cofinanziamento comunitario per i medesimi progetti. Con l'eccezione del 2005, negli ultimi dieci anni le medie sono costantemente salite, indice di uno spostamento verso progetti che non possono generare reddito

Fig. 31 - Percentuale media del cofinanziamento comunitario e media delle percentuali di cofinanziamento per i progetti a titolarità italiana finanziati nel periodo 1992 - 2005

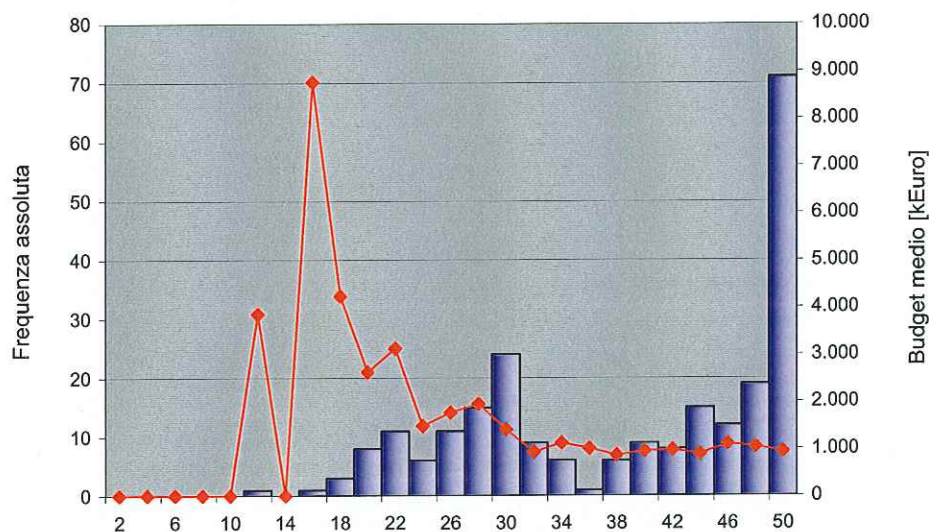

A questo proposito, per alcune annualità, il numero dei progetti che hanno beneficiato di un cofinanziamento comunitario pari al 50%, è risultato superiore al numero dei soggetti pubblici presenti tra gli aggiudicatari dei finanziamenti stessi. Ciò è indice di interesse, anche da parte dei soggetti privati, per iniziative in campo ambientale che non abbiano ricadute commerciali dirette.

Nell'istogramma di Figura 32 è mostrata la distribuzione di frequenza assoluta²⁹ delle percentuali di cofinanziamento comunitario, per i progetti a titolarità italiana finanziati nel periodo 1992-2005. Sono evidenti due picchi, corrispondenti al 30% e al 50%, le due percentuali di cofinanziamento massimo concedibile, rispettivamente, per progetti che sono in grado di fornire reddito consistente o per progetti non atti a generare reddito. La spezzata rappresenta il budget medio dei progetti all'interno di ciascuna classe di cofinanziamento percentuale.

²⁹ I dati relativi ai cofinanziamenti comunitari sono stati suddivisi in classi uguali di ampiezza 2%.

Fig. 32 - Distribuzione di frequenza assoluta delle percentuali di cofinanziamento comunitario e budget medio all'interno di ciascuna classe

2.2.2 Tipologia dei soggetti beneficiari

In Figura 33 è mostrata la ripartizione dei progetti a titolarità italiana finanziati nel periodo 1992-2005, effettuata in base alle categorie di soggetti beneficiari³⁰. Le proposte di progetto finanziate in maggior numero sono state presentate, nell'ordine, dalle PMI (67), dalle Autorità locali (47) e regionali (22), dalle Istituzioni di ricerca (19) e dalle Imprese internazionali (18), seguite poi da tutte le altre.

Nella successiva Figura 34 è mostrata la ripartizione dei medesimi progetti, effettuata raggruppando le categorie secondo tre tipologie di soggetti: pubblici, privati e ONG/Fondazioni³¹. I soggetti pubblici e i soggetti privati si dividono quasi equamente i progetti finanziati, con una leggera prevalenza dei soggetti privati. La quota delle ONG e delle Fondazioni si attesta complessivamente intorno al 5%.

³⁰ L'assegnazione dei progetti alle rispettive tipologie è stata effettuata utilizzando le originarie individuazioni UE o risalendo ad esse attraverso le informazioni riportate nel database dei progetti LIFE Environment, consultabile sul sito dell'Unione Europea, alla pagina LIFE. Sette progetti (su un totale di 232) non sono stati considerati, in quanto l'attribuzione ad una delle tipologie di beneficiario risultava ambigua.

³¹ Questa modalità sintetica di raggruppamento è frequente nella prassi corrente ed in particolare nei progetti afferenti a programmi di finanziamento comunitario. In realtà le Organizzazioni Non Governative (ONG) e le Fondazioni sono, esse stesse, soggetti di diritto privato.

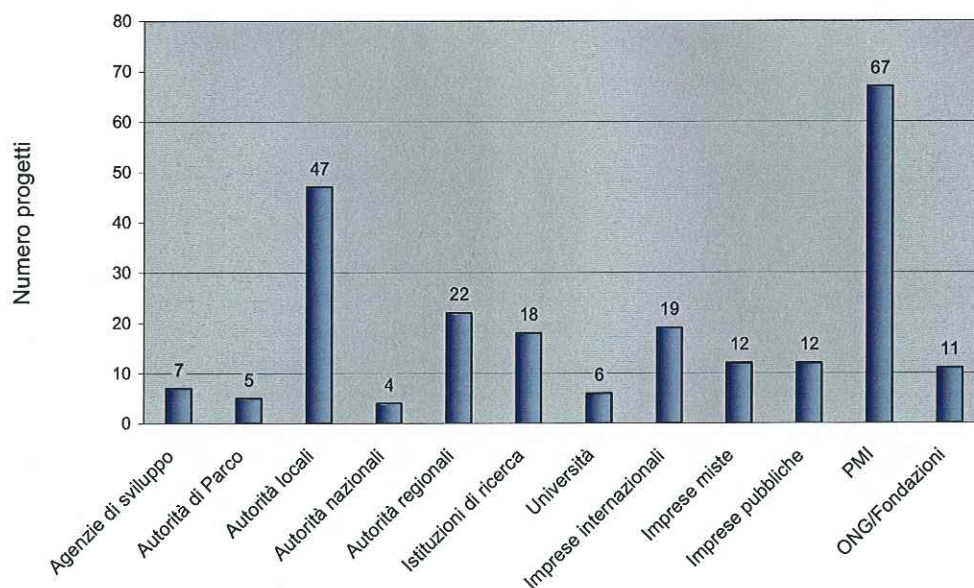

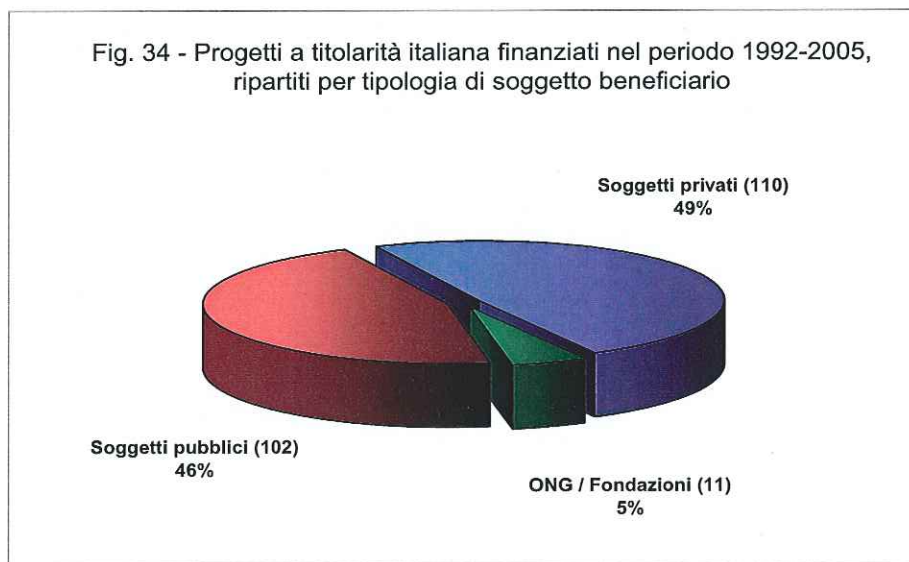

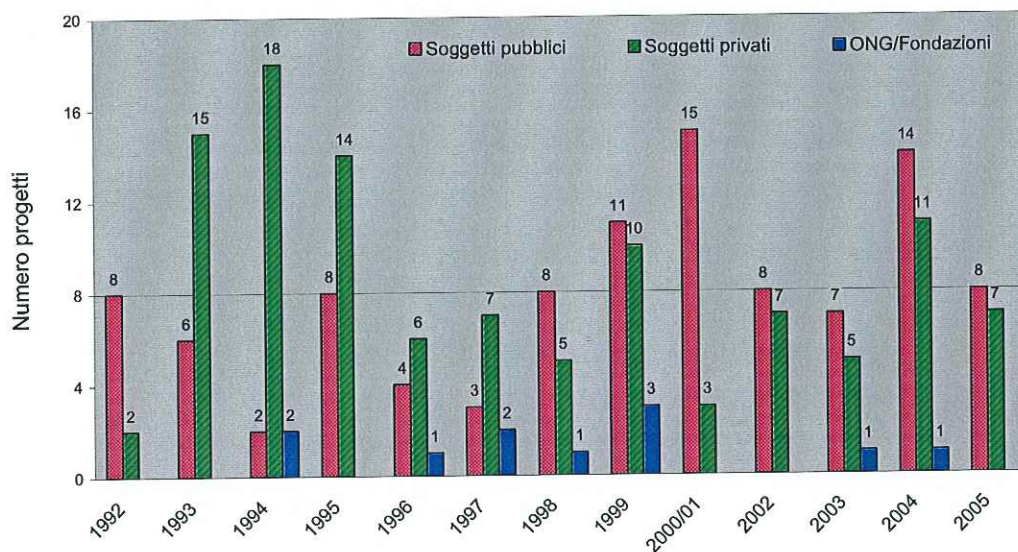

Fig. 34 - Progetti a titolarità italiana finanziati nel periodo 1992-2005, ripartiti per tipologia di soggetto beneficiario

Infine, in Figura 35, è mostrata la ripartizione degli stessi progetti nelle tre tipologie mostrate in Figura 34, ripartite per anno di finanziamento. Spicca la prevalenza dei soggetti privati nei primi anni del programma, seguita da un'inversione di tendenza, indicativa del crescente coinvolgimento dei soggetti pubblici nel programma LIFE Ambiente.

Per quanto concerne il budget totale dei progetti finanziati ed il relativo cofinanziamento comunitario, ci limitiamo a riportare i dati degli ultimi 5 anni, relativi al ciclo LIFE III.

In Tabella IV e in Figura 36 è mostrato il budget totale dei progetti a titolarità italiana finanziati nel periodo 2000/01-2005.

2.2.3 Ripartizione territoriale

In Figura 38 e Tabella VI è mostrata la ripartizione dei progetti a titolarità italiana finanziati nel periodo 2000/01-2005, effettuata in base alle regioni beneficiarie³². Nel periodo, la regione che ha avuto il maggior numero di progetti finanziati è l'Emilia Romagna (22), seguita dalla Lombardia e dalla Toscana (11), Veneto (8), Lazio e Liguria (7). Quattro regioni, Basilicata, Calabria, Molise e Valle d'Aosta, non hanno avuto progetti finanziati.

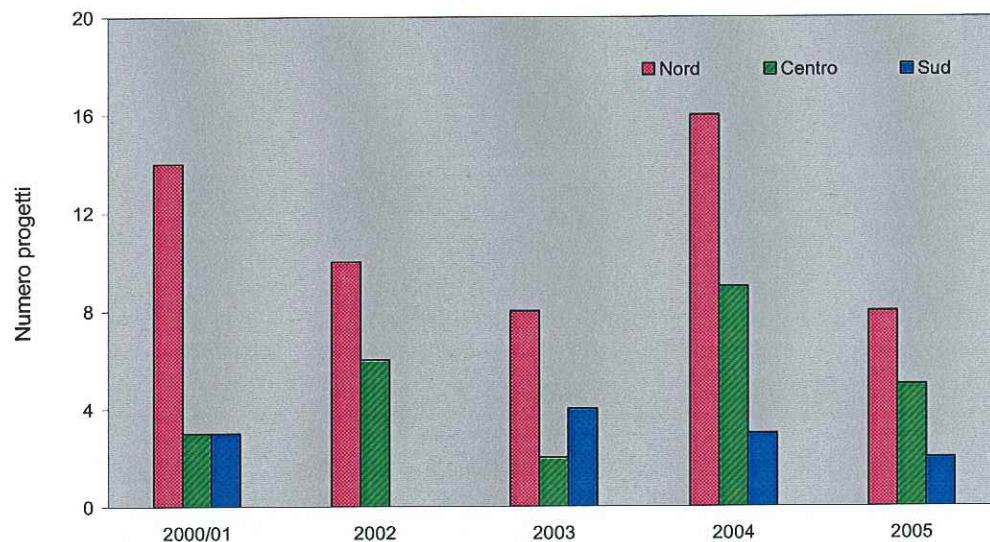

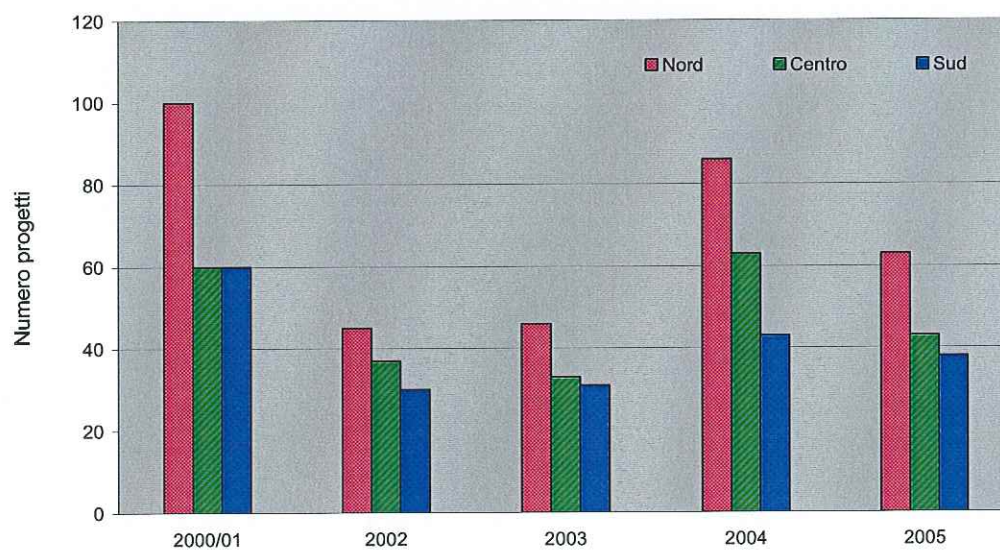

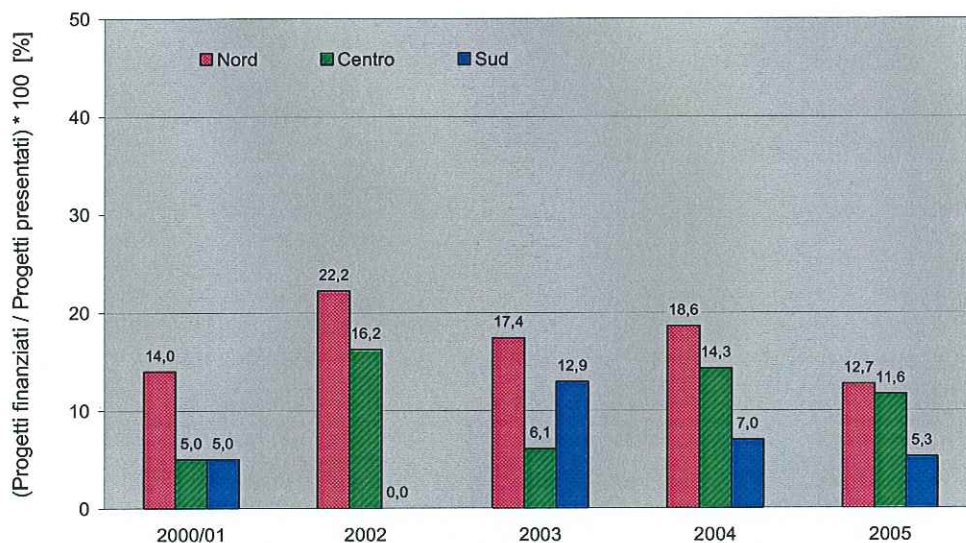

Fig. 41 - Progetti italiani presentati nel periodo 2000/01 - 2005, ripartiti per area geografica

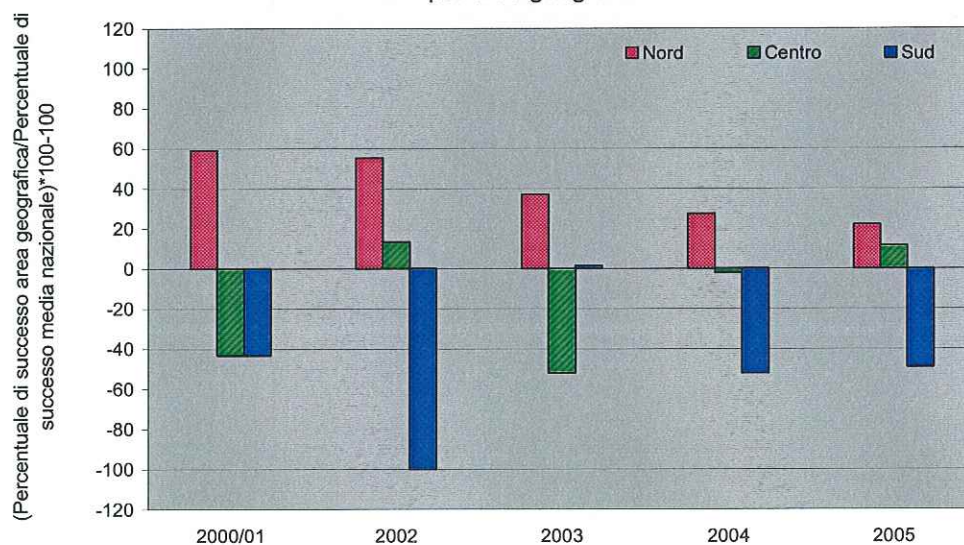

In Figura 42 è mostrato il diverso grado di qualità delle proposte progettuali in funzione delle aree geografiche Nord, Centro, Sud, misurato dal rapporto tra le proposte finanziate e le proposte presentate. La percentuale di successo media delle proposte progettuali presentate dalle regioni del Nord è del 17%, del Centro del 10,6%, del Sud del 6%, ma con rilevanti fluttuazioni, anche su base statistica.

Fig. 42 - Percentuale di successo in funzione dell'area geografica dei progetti italiani presentati nel periodo 2000/01 - 2005

Infine, in Figura 43 è mostrata la percentuale di successo per anno e per aggregazione territoriale, normalizzata rispetto alla percentuale di successo media dell'anno di riferimento. Le regioni del Nord mostrano una percentuale di successo stabilmente superiore alla media nazionale annuale, ma in costante calo, mentre quelle del Sud mostrano una percentuale di successo sensibilmente inferiore alla media annuale nazionale. Le regioni del Centro si collocano in posizione intermedia.

2.2.4 Ripartizione per tematica progettuale

I progetti LIFE Ambiente, come già in precedenza riportato, sono stati suddivisi nelle seguenti 5 tematiche progettuali, a loro volta ulteriormente suddivise in sottotematiche:

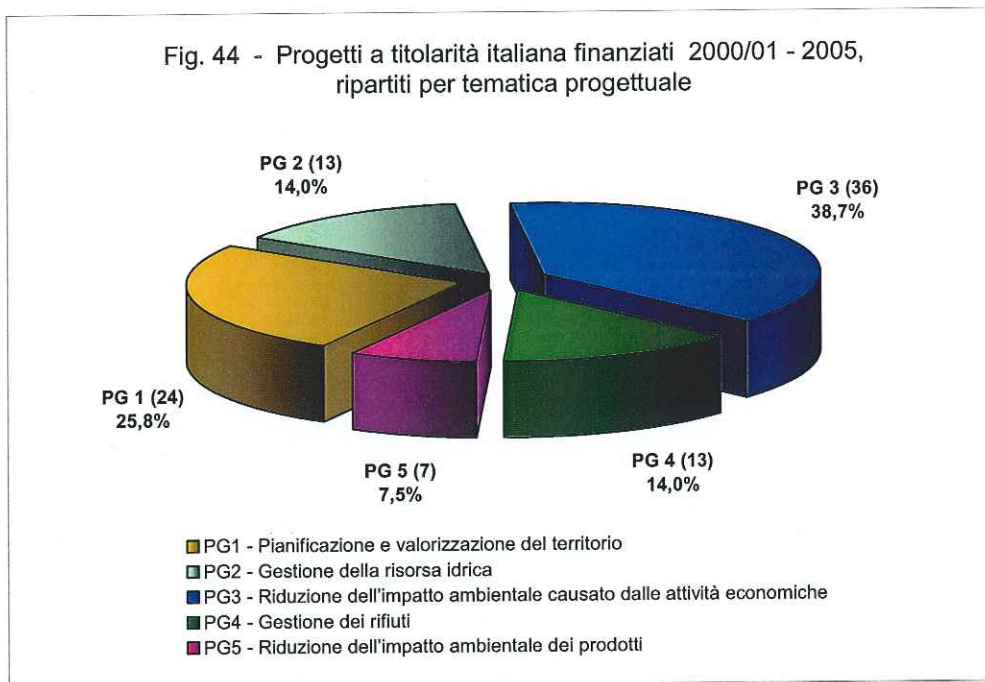

- PG1 - Pianificazione e valorizzazione del territorio
- PG2 - Gestione della risorsa idrica
- PG3 - Riduzione dell'impatto ambientale causato dalle attività economiche
- PG4 - Gestione dei rifiuti
- PG5 - Riduzione dell'impatto ambientale dei prodotti

In realtà, la modulistica per la presentazione delle proposte progettuali LIFE prevede che il proponente individui un'unica tematica - o sottotematica - progettuale, anche quando una proposta interessa diverse tematiche ambientali. Una migliore caratterizzazione dei progetti finanziati si potrebbe ottenere considerando le parole chiave attribuite a ciascun progetto a livello comunitario e riportate nella banca dati del sito LIFE della Commissione³³. Purtroppo, le parole chiave non sono sempre idonee per individuare univocamente la tematica del progetto; esse sono infatti raggruppate in 19 *temi*, sotto i quali una parola chiave può comparire più volte senza che sia possibile risalire al *tema* principale. Inoltre il sito LIFE della Commissione non permette ricerche incrociate con più parole chiave³⁴. Ad ogni buon conto, per completezza di informazione, in appendice 3 è allegato l'elenco dei *temi* con le relative parole chiave.

In Figura 44 sono mostrati i progetti a titolarità italiana finanziati nel periodo 2000/01-2005, ripartiti secondo la tematica progettuale. Si può osservare che le tematiche relative alla pianificazione e valorizzazione del territorio (PG1) ed all'impatto delle attività economiche (PG3) sono quelle che hanno ottenuto il maggior numero di progetti finanziati.

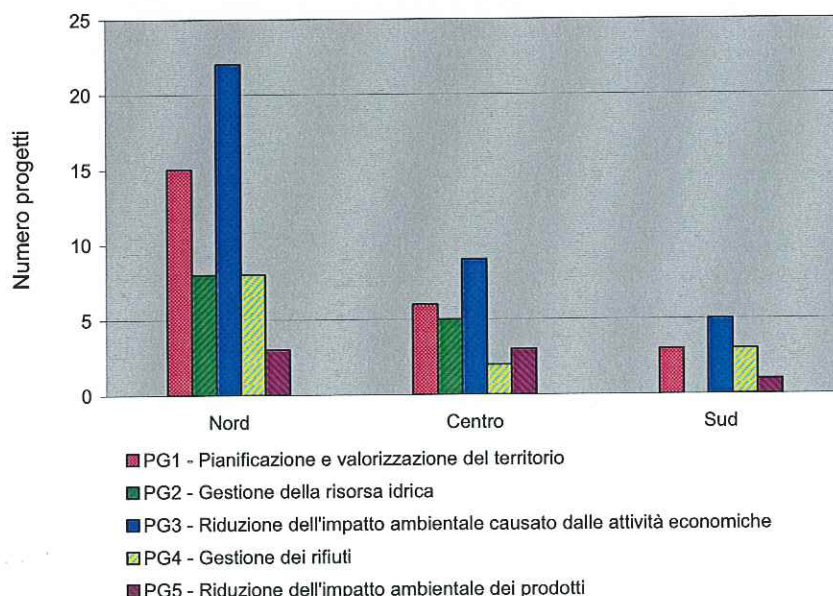

³³ <http://www.europa.eu.int/comm/environment/life/index.htm>.

³⁴ Per chi volesse approfondire l'argomento, consigliamo di integrare e confrontare i dati relativi alla tematica progettuale (PG) con le informazioni contenute nel data base della Commissione.

In Figura 45 sono mostrati i progetti a titolarità italiana finanziati nel periodo 2000/01-2005, ripartiti secondo la tematica progettuale³⁵ e secondo l'area geografica.

³⁵ di 1 progetto non si ha il riferimento dell'area tematica.

Nelle Figure 46 e 47 sono mostrati i progetti a titolarità italiana rispettivamente finanziati e presentati nel periodo 2000/01-2005, ripartiti secondo la tematica progettuale e l'annualità.

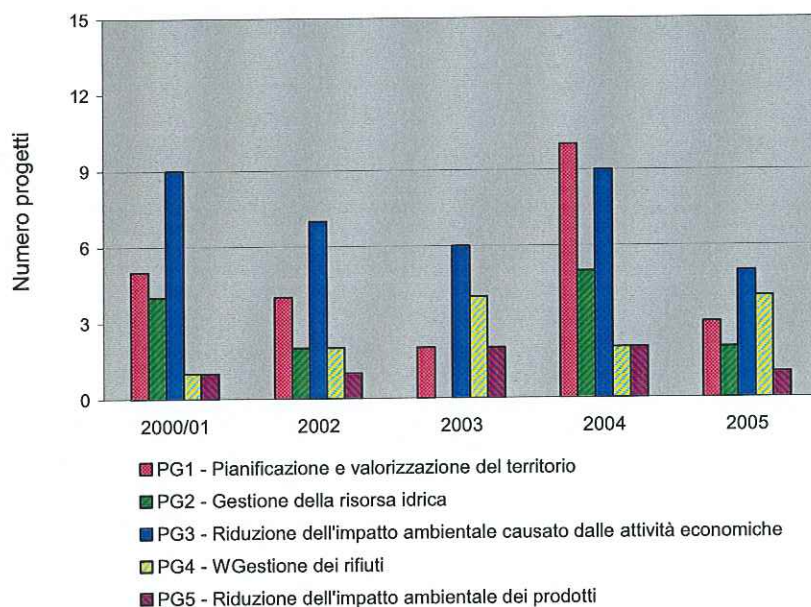

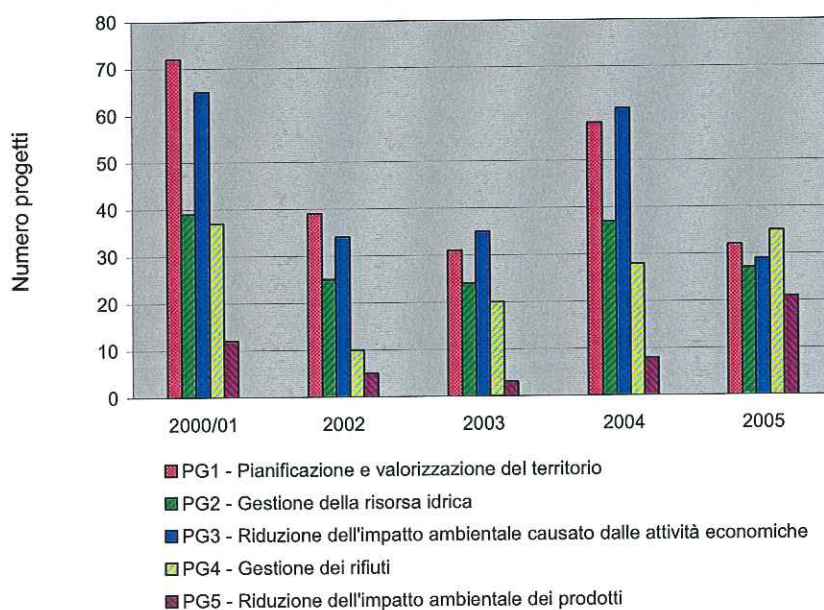

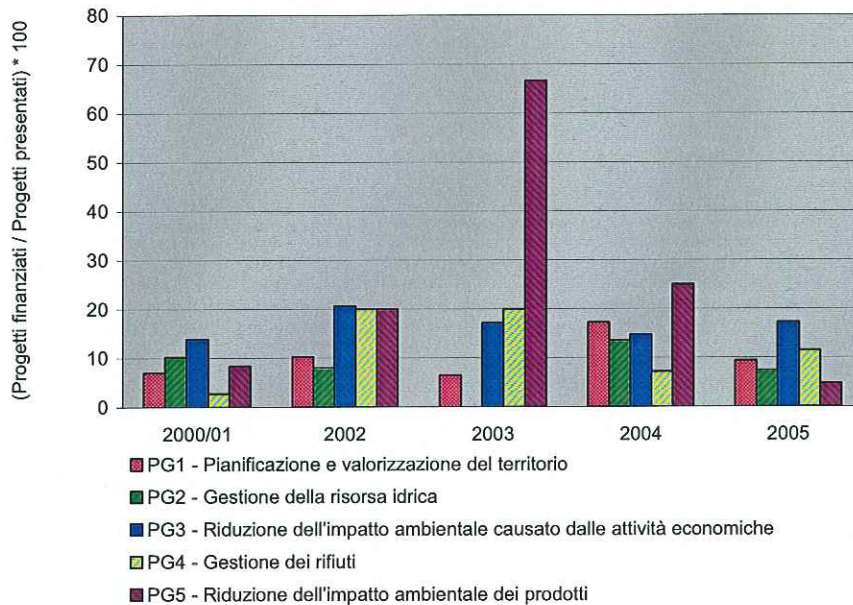

Fig. 47 - Progetti italiani presentati nel periodo 2000/01 - 2005, ripartiti per tematica progettuale e per annualità

Infine, in Figura 48 è mostrato il diverso grado di qualità delle proposte progettuali in funzione della tematica progettuale, misurato dal rapporto tra le proposte finanziate e le proposte presentate³⁶.

Fig. 48 - Percentuale di successo dei progetti italiani presentati nel periodo 2000/01 - 2005 in funzione della tematica progettuale

³⁶ Il dato relativo al PG5 per il 2003 (67%) va considerato con la dovuta cautela per la scarsa consistenza numerica; esso è infatti dovuto al finanziamento di due soli progetti sui tre presentati

Aree tematiche dei progetti: evoluzione nel corso della fase III del programma Life Ambiente 2000 - 2005

2000/01 - 2004

2005

2000/01 - 2004		2005	
PG.1	Pianificazione e valorizzazione del territorio	PG.1	Pianificazione e valorizzazione del territorio
PG.1.1	Ambiente urbano: sviluppo strumenti normativi, economici, fiscali, informativi per promuovere l'integrazione dell'ambiente nelle politiche economiche e sociali degli enti locali	PG.1.1	Sviluppo urbano sostenibile PG.1.1.1 - Promozione e sviluppo di piani per il trasporto urbano sostenibili nelle città PG.1.1.2 - Implementazione della gestione ambientale integrata urbana nelle città
PG.1.2	Qualità dell'aria e riduzione del rumore	PG.1.2	Gestione della qualità dell'aria PG.1.2.1 - Soluzioni innovative per l'abbattimento degli inquinanti dell'aria
PG.1.3	Gestione integrata delle zone costiere	PG.1.3	Altra area
PG.1.4	Altra area		
PG.2	Gestione delle acque	PG.2	Gestione sostenibile delle acque sotterranee e di superficie
PG.2.1	Gestione delle acque a livello di bacino idrografico	PG.2.1	Impatto delle pratiche agricole e forestali sulla qualità delle acque
PG.2.2	Protezione delle acque sotterranee	PG.2.2	Miglioramento nella gestione delle acque di scarico e tecnologie di trattamento
PG.2.3	Treatmento delle acque reflue	PG.2.3	Eliminazione, cessazione degli scarichi ed emissioni e perdita di sostanze pericolose
PG.2.4	Fonti diffuse e disperse di inquinamento dell'acqua	PG.2.4	Prevenzione e controllo di inondazioni (gestione del bacino idrico)
PG.2.5	Altra area	PG.2.5	Altra area
PG.3	Impatto delle attività economiche	PG.3	Minimizzazione dell'impatto ambientale delle attività economiche
PG.3.1	Tecnologie pulite	PG.3.1	Tecnologie pulite PG.3.1.1 - Attività manifatturiere coperte dalla direttiva IPPC PG.3.1.2 - Supporto ad azioni indirizzate al superamento di ostacoli nello sviluppo di tecnologie pulite non coperte dalla direttiva IPPC
PG.3.2	Gestione integrata dell'ambiente	PG.3.2	Riduzione dell'emissione di gas a effetto serra PG.3.2.1 - Sviluppo di innovative tecnologie o metodi in grado di ridurre in modo sostanziale e quantificabile le emissioni di gas serra PG.3.2.2 - Applicazioni innovative che utilizzano sorgenti di energia rinnovabile per impianti in piccola scala o scala locale (<10 MW)
PG.3.3	Riduzione delle emissioni di gas a effetto serra	PG.3.3	Altra area
PG.3.4	Turismo sostenibile		
PG.3.5	Altra area		

Area tematica dei progetti: evoluzione dal 2000 al 2005 (segue)

2002-2004		2005	
PG.4	Gestione dei rifiuti	PG.4	Gestione dei rifiuti (prevenzione, riuso, recupero e riciclo)
PG.4.1	Imballaggi e plastica	PG.4.1	Prevenzione rifiuti
		PG.4.1.1	Riduzione produzione rifiuti attraverso interventi sulla produzione e/o il consumo
		PG.4.1.2	Riduzione dei rischi associati a sostanze pericolose contenute nei prodotti
PG.4.2	Rifiuti pericolosi o di difficile gestione	PG.4.2	Riuso dei prodotti, o parte di essi o estensione del ciclo di vita
		PG.4.2.1	Dimostrazione della accettabilità dei sistemi di riuso nel mercato
		PG.4.2.2	Progettazione di sistemi di riuso innovativi che rispondano all'esistente domanda del mercato
PG.4.3	Rifiuti particolarmente voluminosi	PG.4.3	Promozione del riciclo
		PG.4.3.1	Sviluppo di sistemi innovativi per un più efficiente smistamento dei rifiuti
		PG.4.3.2	Rimozione di barriere tecniche e/o dimostrazione di nuovi usi di materiali riciclati
PG.4.4	Altra area	PG.4.4	Altra area
PG.5	Politica integrata dei prodotti	PG.5	Riduzione dell'impatto ambientale dei prodotti e dei servizi
PG.5.1	Ecoprogettazione, ecoefficienza, prodotti finanziari verdi	PG.5.1	Progettazione ambientale innovativa di prodotti e servizi
PG.5.2	Marchi di qualità ecologica	PG.5.2	Riduzione dell'impatto ambientale durante la fase di utilizzo di prodotti e servizi
PG.5.3	Altra area	PG.5.3	Altra area
